github.com/emil2602 🐙

I'm a developer with a good background in building of non-commercial "turn-key" projects. I have experience in SPA/PWA development with using React, building websites and understanding of UI/UX. I have a strong intermediate written and spoken English for clear communication with foreign clients, reading/writing manuals and tech documentation. I actively looking for a company with a good team to fulfill my potential, add value to the company and gain new knowledge.
